**Join Broadcom at the SASE & ZTNA Forum
— Paris, Mar 24, 2026**

Broadcom is proud to sponsor this year's SASE & ZTNA Forum at the Palais des Congrès de Paris. Visit our booth and don't miss the session "From Visibility to Value: Enrich, Protect, and Monetize Your SASE Strategy" presented by Nestor Falcon, Solutions Architect, EMEA. We'll explore Zero Trust with SASE, the rise of platformization, the evolution of SD-WAN, and real-world AI use cases shaping the future of secure access.

FEATURED ARTICLES**What's New With AppNeta?**

We are pleased to announce enhancements released for AppNeta over the last month including a Monitoring Point operating system update, and enhancements to the early access AppNeta with Intelligent Alarms experience, including dynamic baseline thresholds for alarms and a redesigned route visualization. To stay informed about new releases, subscribe to release announcements. [Review Release Information](#)

AppNeta: Design Browser Workflows for Web App Monitoring

In this new training course, learn how to design, build, and troubleshoot Selenium-based browser workflows in AppNeta to reliably monitor web applications and validate user experience. [Learn more](#)

AppNeta by Broadcom: Optimizing Healthcare Network Performance

As healthcare systems grow more dependent on hybrid cloud, SaaS, and third-party networks, performance issues can directly affect clinical workflows. Learn how AppNeta by Broadcom delivers proactive, end-to-end visibility across the full user experience, helping IT teams spot degradation early and keep EHR, telehealth, and critical services running smoothly. [Find out more](#)

From Outage to Oversight: Why Healthcare Network Observability Is Critical for Ensuring Patient Care and Compliance

This blog explores how path-centric visibility, AI-enabled predictive intelligence, and synthetic validation help healthcare IT teams safeguard point-of-care performance and resolve issues before they impact patient care. Learn how a smarter approach to network observability ensures uninterrupted clinical care delivery. [Read more](#)

Beyond the Virtual Wall: Extending VCF Visibility with Network Observability by Broadcom

This blog explores how Network Observability by Broadcom bridges the gap between private clouds and external dependencies like ISPs, SaaS, and Wi-Fi. Learn how unified, path-aware visibility empowers operations teams to pinpoint performance bottlenecks across physical and virtual layers while reducing tool sprawl and total cost of ownership. [Uncover the details](#)
