**AI-Driven NetOps: How Enterprises are Embracing Intelligent Network Management Solutions**

Join EMA's webinar on AI-Driven NetOps to explore how enterprises are embracing intelligent network management. Despite AI's promise, only 35% of IT pros report full success. VP of Research Shamus McGillicuddy will share survey insights on evaluating AI solutions, the role of network data, desired use cases, and what true success looks like.

**What's New With AppNeta?**

We are pleased to announce enhancements released for AppNeta over the last month including a new flexible container-based Monitoring Point for Docker or Podman environments, improved capacity metric responsiveness, and early access to alarm noise filtering and an alarm webhook connector in the Intelligent Alarms experience.

**Intelligent Alarms** is AppNeta's new framework for detecting and surfacing persistent network and application issues. To obtain early access to AppNeta enhanced with Intelligent Alarms, please talk to your Broadcom Account Representative. [Review Release Information](#)

**The Era of Converged Network Observability**

Network engineers know that slow is the new down. Broadcom's latest blog explores how unified observability—powered by AppNeta integration—bridges internal infrastructure with the public internet to predict and prevent issues before they impact users. [Read the Full Blog](#)

**Why Network Observability is the Heart of the New VCF Era**

The VMUG Cloud Operations and VCF User Experience Report 2026 reveals how organizations are navigating the complexity of VMware Cloud Foundation 9. Key insights show network performance as a cornerstone of success, the need to break down silos between cloud and network teams, and the importance of establishing performance baselines before migration. With Private AI adoption emerging and skills gaps shaping cautious timelines, the report offers a roadmap for mastering cloud operations with precision. [Learn More](#)

**2026 NetOps Imperative eBook**

The 2026 State of NetOps ebook reveals the new operational imperative for modern enterprises: mature observability. As visibility gaps, automation immaturity, and workforce strain make traditional models unsustainable, this eBook shows how unified observability provides the framework to close blind spots, strengthen resilience, and empower IT teams to anticipate and prevent disruptions before they impact business outcomes.
