

## FEATURED EVENT

The 2026 Network Observability Virtual Summit is officially here, and you won't want to miss it!

June 10, 2026 | 11:00 a.m. ET

In the AI and Agentic Era, the network is no longer infrastructure—it's the intelligence layer driving business outcomes. [Join Google Cloud, Broadcom, ONUG, and industry leaders](#) as we map the path forward with a GPS for NetOps teams navigating multi-cloud and hybrid complexity.

Discover how to transform operations from reactive to predictive. See how leaders like **Ameriprise, PG&E and Intrado** move from weeks to minutes in triage while ensuring mission-critical resilience. Learn how modern observability delivers full client-to-cloud visibility, validates alerts, and pinpoints root cause with precision. From re-platforming networks to operating at AI speed—this is your roadmap to the Intelligence Frontier.

Save your seat now!

## FEATURED ASSET

### Announcing an Expanded Collaboration with Google Cloud on Cloud Network Insights - Enabled by AppNeta by Broadcom

Broadcom and Google Cloud are deepening their collaboration with the launch of Cloud Network Insights, enabled by AppNeta.

The service gives Google Cloud users comprehensive visibility across distributed, hybrid, and multi-cloud networks, enabling faster diagnostics and improved performance management.

It's a significant announcement as it validates that active synthetic monitoring and hop-by-hop visibility are essential for managing distributed applications.

## FEATURED ARTICLES

#### What's New With AppNeta?

We are pleased to announce enhancements released for AppNeta over the last month including the general availability release of the new [AppNeta with Intelligent Alarms](#) experience, AppNeta's new framework for detecting and surfacing persistent network and application issues. Alarms highlight problems in your network that matter—specifically, those that persist over time and impact user experience. [Review Release Information](#)

#### Network Management Megatrends 2026: Automation, Hybrid and Multi-Cloud Networks, and AI Transformation

May 27 | 1 p.m. ET | EMA's 2026 Megatrends report exposes a critical gap: only 31% of enterprises are winning at NetOps as outages, alert noise, and tool sprawl surge. Join Shamus McGillicuddy to uncover how leading teams are transforming observability, automating operations, and mastering hybrid multi-cloud networks to thrive in the era of AI. [Register Now](#)

#### Beyond the Private Cloud Perimeter: 4 Use Cases for Proactive Network Observability

Private cloud blind spots are costing teams time, performance, and credibility — but they don't have to. In this blog, we break down four real-world use cases showing how proactive network observability eliminates hidden issues, slashes MTTR, and keeps every application path performing at its peak. [Dive into the Full Story now](#)

#### When the Network Gets Blamed—Patient Care Suffers

Clinical care depends on fast, reliable digital workflows—from EHR access to conducting telehealth visits. Path-centric network observability helps cut delays, speed issue resolution, and optimize the patient experience. [Explore the full analysis in IT Ops Times](#)

## FEATURED RESOURCE

#### SmallBytes Webinars 2026

Experience live demos, expert guidance, and interactive Q&As that help you unlock the full potential of intelligent network management.

#### Introducing Our New Intelligent Alarms Training for AppNeta

May 13, 2026 | [Register here](#)
